

16th International Conference on Surfaces,
Coatings and Nanostructured Materials
www.nanosmat.org/special.html

SHORT BIO:

Angela Gondolini is a Researcher at the Institute of Science, Technology and Sustainability for Ceramics (ISSMC) of the National Research Council of Italy. Her main expertise lies primarily in the synthesis and characterization of ceramic micro- and nano-powders for energetic and catalytic applications. She has a solid background in slurry preparation and shaping processes for the development of energy technologies. Her recent research activities focus on the fabrication of multilayer ceramic structures for solid oxide fuel cells (SOFC) and electrolyzers (SOECs), high temperature gas separation membranes, and catalyst development for hydrogen production and sustainable processes.
