

17th International Conference of Surfaces, Coatings
and Nanostructured Material | **NANOSMAT2026**
RHODES-GREECE | 6-10 JULY 2026
www.nanosmat.org

SHORT BIO:

Luigi Marsico is a postdoctoral researcher at the Institute on Membrane Technology “E. Drioli” of the National Research Council of Italy (ITM - CNR), with a background in environmental engineering. He works on the development and analysis of membrane gas separation processes for the treatment of gaseous streams. The focus is on the evaluation of the performance of membrane separation integrated into processes dedicated to the production of hydrogen, methane and methanol.
