

17th International Conference of Surfaces, Coatings
and Nanostructured Material | **NANOSMAT2026**
RHODES-GREECE | 6-10 JULY 2026
www.nanosmat.org

SHORT BIO:

Prof. Giuseppina Cerrato

Full Professor of Inorganic Chemistry at the Department of Chemistry – UniTO - since 2025 (as a natural progression from associate professor, researcher and senior technician in the same institution since 1995).

She has co-authored ca. 190 publications (Scopus source: h index = 43, over 6500 citations; March 2026) in international journals, 15 book chapters, dedicated to the study of oxidic (or phosphatic) nanomaterials to be used in biomedical, catalytic and photocatalytic fields. Her expertise is linked with either vibrational spectroscopies (FTIR-ATR and Raman) and/or electron microscopies to shed some light on the possible relationship between structure and properties of the (nano)materials.
