SHORT BIO:

Marco Daturi

After having performed his studies at the University of Genoa, Marco Daturi moved to the University of Caen for a post-doc in 1997, where he became associate professor in 1998, then professor of Physical Chemistry in 2002. He develops his researches at the Laboratory of Catalysis and Spectrochemistry in Caen. Using *in situ* and *operando* techniques (mainly vibrational spectroscopies), he performs mechanistic studies in different domains of heterogeneous catalysis and develops (porous) materials for pollutants' removal, indoor air quality, CO₂ capture and reuse.
