## SHORT BIO:

**Prof. Neerish Revaprasadu, FRSC** is a Senior Professor In the Department of Chemistry at the University of Zululand. He obtained his B.Sc (Hons) from University of Natal, South Africa in 1994 and Ph.D from Imperial College, London, UK in 2000. He has published 280 research articles and 35 book chapters. He has more than 8000 citations with an H-index of 47. He has given more than 85 lectures at national and international conferences. The research focus of the chair is on developing routes for the delivery of high-quality functional materials. The current focus is on earth abundant materials using metal complexes as single source precursors via solventless, hot injection and chemical vapour deposition routes. The functional materials are used for application in energy generation and storage. He is a member of the South African Academy of Science (MASSAF) and Fellow of the Royal Society of Chemistry (FRSC). He is the current associate editor of the Special Periodic Reports (SPR) on Nanoscience published by the Royal Society of Chemistry.
